

FROM CHILL.—The editors of the *Herald* have received their correspondence from Valparaiso in the 10th century, by the way of the Indians of Pe-  
ru.

The situation of affairs in Chili was by no means satisfactory, owing principally to the bloody conflicts and continual exactions of Ross, the Director of the Argentine Republic. The climate of Chili is very severe, and the country is divided into various regions of soil, water, and vegetation. The coast is covered with a dense forest of palm trees, while the interior is a desert plain, where the temperature is very high. The mountains are covered with snow, and the rivers are filled with ice. The climate is very dry, and the people are mostly of Indian descent. The capital, Santiago, is situated on the coast, and has a population of about 100,000. The city is surrounded by hills, and the surrounding country is very hilly and mountainous. The people are mostly of Indian descent, and the language spoken is Spanish. The currency consists of gold and silver coins, and the principal exports are copper, tin, and silver.

WASHINGTON AVENUE REFORMED CHURCH.—We regret to learn that this new church will be dedicated on the 25th of June, at 10 o'clock, by the Rev. Alexander R. Thompson, formerly of Morris- town, N.J., who has been elected for some Sabbath past. Mr. Thompson having left this place and gone to Staten Island, in consequence of an unhappy difference of opinion between him and some of the congregationalists, he has sold his house to those who had been instrumental in establishing the church. We learn, however, that the Board of Missions have appointed the Rev. Mr. Van Kleet, of New Haven, to succeed him, and the church will be opened next Sabbath, and the services will be conducted by him.

COMMERCIAL AND MONEY MATTERS.

For Sales of Stocks, &c., see *Fourth Page*.

FRIDAY, May 25.—P. M.

To-day was one of the quietest days at the Stock Board that we have noticed for some time. There was no disposition to operate, and the few transactions were made at heavy prices. There was no excitement in the street of any kind, and the shorts in Harvey seemed to have gotten over some of the fright of the late raid rise.

In Bills there is nothing of importance doing.—There will be no activity until the steamer arrives. She will be due to-morrow. Although there is much less anxiety to hear from the other side than there was some time ago yet the holders of produce here feel a very great desire to have better advices. There is a very general apprehension that Cotton will still further decline in Liverpool, and advice of an improved state of feeling would relieve much of this apprehension.

A moderate advance in breadstuffs would afford a margin for shipments at the present decline this side, and shipping demand for our surplus flour, wheat and corn would put new vigor into every department of trade.—An increase of our exports is imperatively needed, while our imports are so large, in order to arrest the drain of coin.

About 1,000 bales of Cotton were engaged to-day for Liverpool at \$45-25, and some heavy freight provisions, &c., at \$45-75. There was also an engagement of four hundred bales from Canada to the 20th of May.

OCEAN STEW. CO.'S LINE.—From *Grenada & St. Vincent*.—Capt. STANNARD.—For New York, May 17.

On the 20th the steamer *Hebeus* arrived at Southampton on the 20th of the month. When the 20th falls on Friday the 21st of May, the steamer will be due to-morrow.

INDEPENDENT LINES.—From Liverpool:

UNITED STATES.—Capt. HARRISON.—For New York, May 17.

SARAH SANDS.—Capt. THOMAS.—For New York, Oct. 10.

PINE HARBOR.—Capt. HARRISON.—For New York, May 10.

CUNARD LINE.—Saila from Liverpool weekly.

HOBOKEN.—Capt. STANNARD.—For New York, May 15.

NAVARRE.—Capt. STANNARD.—For Boston, May 15.

ROUND HILL WATER-CURE RETREAT.—The In-

terior of the building is a new and splendid style of Gothic. The door is in a recessed porch and the windows are arched and pointed. The roof is gabled and the eaves are decorated with stone corbels.

HAIR DYE.

12.—Batcheler's Instantaneous Liquid Color-

for the Hair is now ready for producing a natural color of hair, without injury to the hair or scalp.
